

1915 Studios – Recruiting for Next Cohort - 1915 Studios is a partnership between Georgia-Pacific and gener8tor. The accelerator runs for 12 weeks out of Georgia-Pacific's R&D center in Neenah, Wisconsin. You are welcome to spend the entire 12 weeks at our facility or you can choose to spend most of that time remote. We do require your physical presence 3 times during the 12 weeks. The accelerator is free and you get access to well over 200+ engineers and scientists as well as the amazing capabilities at our R&D center. You also gain access to Georgia-Pacific's many sister companies that are privately owned by Koch Industries
